

**“Data improves services and develops new treatments;
data adds to knowledge and understanding;
data saves lives.”**

Patient advocate, use MY data

use MY data is a movement of patients, carers and relatives

**Our vision is of every patient willingly giving their data to help others,
knowing that effective safeguards to maintain the confidentiality
and anonymity of their data are applied consistently, transparently
and rigorously**

**We are building an online library, where the patient voice is heard
direct, talking about the rewards of using their data**

*“This work uses data provided by patients
and collected by the NHS as part of their
care and support.”*

**We are campaigning to have a citation on all
reports using patient data**

**We want patient representation on all committees that
make decisions about using patient data**

**We run regular patient data workshops, to give patients a
much better understanding of the uses of their data.**

**We are working towards the media presenting
a balanced view of patient data access & release**

Join us - there is strength in numbers!
